Ved Chauhan

Software Engineer — Systems, Full-Stack & Developer Tools | **Patan, Gujarat, India**

vedchauhan2107@gmail.com | github.com/VED2107 | linkedin.com/in/ved-chauhan2107 | ved.exe.snowbros.me | snowbros.me

SUMMARY

Computer Engineering student and founder of SNOWBROS, an independent software studio that builds products for paying clients and open-source users. Owns work from the first client conversation to a tested production release. Seeking a software engineering internship on a team that ships to real users.

TECHNICAL SKILLS

Languages: TypeScript, JavaScript, Rust, Dart, Python, SQL
Frontend & Apps: React 19, Next.js (App Router), Flutter, Tailwind CSS, Tauri
Backend & Data: Node.js, REST APIs, PostgreSQL, Supabase, Row-Level Security, database design, authorization
Systems & Tooling: Tree-sitter, static analysis, LSP, SQLite, offline sync, HTTP networking, job queues, Docker, libmpv
Testing & DevOps: Vitest, Playwright, pytest, cargo test, dart test, GitHub Actions CI/CD, release automation

EXPERIENCE

Founder & Software Engineer — SNOWBROS, independent software studio — Feb 2026 – Present

Sole developer from first client meeting to launch and support · 3 clients · own products on npm, Windows and Android

- Gave **Vinny's Fashion Hub** a billing and stock system (Atelier) its counter has run on every day since Aug 2026: quick billing, UPI payments via Razorpay, inventory, sales reports and an offline desktop app, guarded by 268 automated tests.
- Took the boutique online with **vinnysvogue.in**, a store the owners run themselves, from products and orders to weekly sales exports.
- Co-led **AMR Drug Repurposing** for Ganpat University's pharmacy college: screened 1,761 approved medicines against 4 drug-resistant bacteria (7,044 simulations) with results on a website the researchers use; earned a Letter of Appreciation.
- Released **NOVA**, the studio's own media player for Windows and Android: plays professional video (ProRes, HDR, 8K) offline with no account, and passes all 55 compatibility tests.
- Moved **STC Academy** from paper logs and spreadsheets to one portal used by 100+ students and staff for admissions, attendance and syllabus.

PROJECTS

Snowbros Atlas — Open-Source Static Analysis Toolchain | github.com/snowbros-labs/atlas — Jul 2026 – Present

Rust, Tree-sitter, petgraph, tower-lsp, TypeScript, GitHub Actions

- Architected a 19-crate Rust workspace (~17k LOC, 340 tests) that lowers JavaScript/TypeScript and Python through Tree-sitter into one shared IR and runs 20+ rules over a project-wide import/symbol graph.
- Engineered an incremental xxh3 cache with byte-identical output: axios (431 files) in ~230 ms cold, ~76 ms warm; a 500-file repo re-analyzes in ~34 ms after a one-file change.
- Shipped a CLI, LSP server, VS Code extension and SARIF output; CI releases v0.4.0 to npm, crates.io and Homebrew.

SwiftDrop — Cross-Platform LAN File Transfer | github.com/VED2107/swiftdrop — Sep 2026 – Present

TypeScript, Node.js, Flutter, Dart, React, Vitest, Playwright

- Engineered a resumable, parallel transfer engine (xxh64-verified blocks, bitmap resume), ported to a pure-Dart core shared by the Flutter Android and Windows apps.
- Raised loopback throughput 232→314 MB/s (10k × 50 KB files) via contiguous batch frames; shipped v1.1.0.

Accounic — Multi-Currency Ledger, Web/Android/Windows | github.com/VED2107/accounic — Aug 2026 – Present

PostgreSQL, Supabase, Next.js, TypeScript, Flutter, GitHub Actions

- Cut dashboard load from 98.2 s to 1.2 s (82×) at 20,000 entries by moving FIFO settlement into a per-person CTE.
- Shipped v1.16.2 to web, Android and Windows from one RLS-isolated SQL engine; CI runs 15 SQL test suites against a throwaway Postgres.

ACHIEVEMENTS

- **1st Rank, Research Conclave 2026**, Ganpat University: team project on AI human activity recognition, Oct 2026.
- **Arduino Edge AI Bootcamp**: IMU gesture classifier on the Arduino UNO Q, Oct 2026.

EDUCATION

B.Tech in Computer Engineering — U.V. Patel College of Engineering, Ganpat University — Expected May 2028

CGPA: 7.5 / 10.0 | IEEE Student Member | Coursework: DSA, OOP, OS, DBMS, Networks
