

Ved Chauhan

Software Engineer • Full-Stack Web Applications

Ahmedabad, India | vedchauhan2107@gmail.com | github.com/VED2107 | linkedin.com/in/ved-chauhan2107 | ved.exe.snowbros.me

SUMMARY

Computer Engineering student building production SaaS platforms, e-commerce applications, and developer tools. Founder of Snowbros, where I design and ship software used by real businesses with modern full-stack technologies.

TECHNICAL SKILLS

Languages: TypeScript, JavaScript, SQL, Rust, HTML, CSS | **Frontend:** React, Next.js, Tailwind CSS, GSAP, Framer Motion

Backend & Database: Node.js, Supabase, PostgreSQL, REST APIs, Database Design, Row-Level Security | **Tools:** Git, GitHub, GitHub Actions, npm, Vercel

EXPERIENCE

Founder & Full-Stack Developer — Snowbros (Independent Software Studio)

Feb 2026 – Present

Next.js, TypeScript, PostgreSQL, Supabase, Vercel

- Design and ship bespoke web systems for small businesses, managing the full development lifecycle from database scoping to deployment.
- Designed PostgreSQL Row-Level Security (RLS) policies and triggers to isolate customer data across production client applications.
- Improved frontend performance and Core Web Vitals by optimizing asset delivery, caching strategies, and rendering pipelines.

PROJECTS

Snowbros Atlas — Codebase Indexing Platform — github.com/snowbros-labs/atlas

Jul 2026 – Present

Rust, Node.js, tree-sitter, npm

- Built an AI-assisted codebase analysis platform that scans large TypeScript repositories to generate dependency maps and structural diagnostics.
- Developed a compiled Rust CLI using tree-sitter AST queries and xxh3 file caching to run instant local audits on modified directories.
- Published the engine to the npm registry ('@snowbros/atlas') to integrate static boundary and circular dependency checks into developer shell environments.

STC Academy — Learning Management System — stc.vercel.app

Mar 2026 – Jul 2026

Next.js, TypeScript, PostgreSQL, Supabase

- Digitized operations for a tuition academy with over 100 students and staff, replacing paper logs and spreadsheets with a custom multi-role web portal.
- Designed a normalized database schema with PostgreSQL triggers to automate attendance score tallies and Supabase RLS for student data privacy.
- Developed separate, role-restricted dashboard interfaces for students, teachers, and administrators to streamline class schedules and grading.

Vinnys Vogue — Luxury E-Commerce Storefront — vinnysvogue.in

Feb 2026

Next.js, TypeScript, Supabase, Tailwind CSS

- Built a production e-commerce platform with product management, shopping cart, checkout, inventory tracking, and an admin dashboard for a luxury fashion brand.
- Configured Server-Side Rendering (SSR) to keep product listings and stock counts synchronized in real-time during checkout sessions.
- Secured backend order database operations and built dashboard reports for exporting weekly sales reports.

VED.EXE — Interactive Developer Portfolio — ved.exe.snowbros.me

Jun 2026 – Jul 2026

Next.js, GSAP, Framer Motion, GitHub API

- Programmed an interactive, terminal-inspired developer portfolio that parses shell commands to showcase personal projects.
- Connected the GitHub REST API to fetch contribution metrics dynamically, styling animations with GSAP and Framer Motion.
- Created a central branding landing page serving as a responsive portal for incoming client scoping inquiries and portfolio demos.

EDUCATION

B.Tech in Computer Engineering — U.V. Patel College of Engineering

Expected May 2028

CGPA: 7.5 / 10.0 | Mehsana, Gujarat, India

Relevant Coursework: Data Structures & Algorithms, Database Management Systems, Object-Oriented Programming, Computer Networks, Operating Systems

IEEE Student Member | Jul 2024 – Present
